The District is a unit of special-purpose local government created pursuant to and existing under the provisions of Chapter 2020-191, Laws of Florida, as amended, (the "Act"). Unlike city and county governments, the District has only certain limited powers and responsibilities.

Under Florida law, special districts are required to take affirmative steps to provide for the full disclosure of information relating to the public financing and construction, acquisition, operation, and maintenance of improvements to real property undertaken by such districts. The law specifically provides that this information shall be made available to all persons currently residing within the District and to all prospective District residents. The following information, describing the North River Ranch Improvement Stewardship District and the assessments, fees and charges that are anticipated to be levied within the District to pay for certain community infrastructure, is provided to fulfill this statutory requirement.

The District is intended to provide for a comprehensive and consistent development approach to promote sustainable and efficient land use, to provide long-term planning for conservation and development, to protect conservation and habitat network lands, allow for flexible management, sequencing, timing, and financing of various systems, facilities, and services to be provided to the lands, and to provide a method for the long term operation, management, and maintenance of infrastructure systems, facilities, and services.

What is the District and how is it governed?

The District is an independent special taxing district created pursuant to and existing under the provisions of Chapter 2020-191, Laws of Florida, enacted on June 9, 2020, as amended by Chapter 2022-244, enacted on May 18, 2022, and Chapter 189, Florida Statutes. The District currently encompasses approximately 2,001.94 acres of land located within the jurisdictional boundaries of Manatee County, Florida. As a local unit of special-purpose government, the District provides an alternative means for planning, financing, constructing, operating and maintaining various public improvements and community facilities within its jurisdiction.

The District is governed by a five-member Board of Supervisors, the members of which must be residents of Florida and citizens of the United States. Within ninety (90) days of the effective date of the Act, members were elected on an at-large basis by the owners of property within the District, each landowner being entitled to one vote for each acre of land with fractions thereof rounded upward to the nearest whole number. The three candidates receiving the highest number of votes were elected to terms which expire on November 17, 2024, and the two candidates receiving the next largest number of votes were elected to terms which expired on November 20, 2022. At the second landowners' election held in November 2022, the two candidates receiving the largest number of votes were elected to 4-year terms. Subsequently, there shall be an election by landowners for the District every two years on the first Tuesday after the first Monday in

November at which supervisors will be elected to serve 4-year terms. Board members shall begin being elected by qualified electors of the District as the District becomes populated with qualified electors based on the following schedule: at 3,463 qualified electors, one governing board member shall be a qualified elector who is elected by qualified electors residing in the District and four members will be elected by landowners; at 6,926 qualified electors the ratio is two-to-three, respectively; at 10,389 qualified electors the ratio is three-to-two, respectively; at 13,852 qualified electors, the ratio is four-to-one, respectively; and at 15,000 qualified electors, all five governing board members shall be persons who are qualified electors who are elected by qualified electors. A "qualified elector" in this instance is any person at least 18 years of age who is a citizen of the United States, a legal resident of Florida and of the District, and who is also registered with the Supervisor of Elections to vote in Manatee County. Notwithstanding the foregoing, if at any time the Board proposes to exercise its ad valorem taxing power, it shall, prior to the exercise of such power, call an election at which all members of the Board shall be qualified electors who are elected by qualified electors who are elected by qualified electors to year in Supervisor of the District.

Board meetings are publicly noticed in accordance with Florida law (i.e. in the local newspaper) and are conducted in a forum open to the public and in which public participation is permitted. Consistent with Florida's public records laws, the records of the District are available for public inspection during normal business hours. Elected members of the Board are similarly bound by the State's open meetings laws and are subject to the same disclosure requirements as other elected officials under the State's ethics laws.

<u>What infrastructure improvements does the</u> <u>District provide and how are the improvements paid for?</u>

The boundaries of the District encompass approximately 2,001.94 acres of land located in Manatee County. The portion of the District known as the Series 2023A Project consists of approximately 413.48 acres and is comprised of Phases I and II (the "Series 2023A Assessment Area"), the legal description of which is attached hereto as **Exhibit A**. The portion of the District known as the Series 202B Project consists of approximately 384.095 acres and is comprised of Phases III (SF), IV-C2 and IV-D (the "Series 2023B Assessment Area"), the legal description of which is attached hereto as **Exhibit B**. The development is planned as a residential development.

The public infrastructure necessary to support the development program includes, but is not limited to, roadways, wastewater and potable water, landscaping, irrigation and hardscape, and recreation facilities (the "Improvements"). Each of these Improvements are more fully detailed below. The Improvements are anticipated to be funded by the District's sale of bonds, notes, or other indebtedness as discussed below (the "Series 2023A&B Project").

On November 14, 2023, the District issued \$9,630,000 North River Ranch Improvement Stewardship District Special Assessment Revenue Bonds, Series 2023A (NRR Tract Project) (the "Series 2023A Bonds") for the purpose of (1) financing a portion of the costs associated with the acquisition, construction, installation and equipping of the Improvements; (2) paying certain costs associated with the issuance of the Series 2023A Bonds, (3) funding the Series 2023A Reserve Account; and (4) funding capitalized interest.

On December 7, 2023, the District issued \$11,335,000 North River Ranch Improvement Stewardship District Special Assessment Revenue Bonds, Series 2023B (NRR Tract Project) (the "Series 2023B Bonds") for the purpose of (1) financing a portion of the costs associated with the acquisition, construction, installation and equipping of the Improvements; (2) paying certain costs associated with the issuance of the Series 2023B Bonds, (3) funding the Series 2023B Reserve Account; and (4) funding capitalized interest.

District Infrastructure Improvements

As noted above, improvements for the Series 2023A&B Project will consist of roadways, wastewater and potable water, landscaping, irrigation and hardscape, and recreation facilities. Further information regarding the specific infrastructure can be obtained from the District's *Supplemental Report for Phase I & Phase 2 of the NRR Tract (Series 2023A Assessment Area)*, dated October 2023, and *Supplemental Report for Phases III, IV-C2 & IV-D of the NNR Tract (Series 2023B Assessment Area)*, dated October 2023.

Roadway Improvements

Primary vehicular access to the Project is to be provided with entrances off Fort Hamer Road and a secondary entrance off US 301 with the future construction of "North River Ranch Trail." The main entrances to the District from Fort Hamer Road will be 2-lane roads with sidewalks and landscaping. Fort Hamer Road will be extended to the north as necessary to serve the development. The other access entrance to the District off US 301 will be North River Ranch Trail, a 2-lane thoroughfare road running east/west through the project. North River Ranch Trail will have on street parking, bikes lanes, and sidewalks. Streetlights may be required and if so, the District will fund and construct the streetlights. Internal roads will be undivided 2-lane residential streets with sidewalks and street lighting. The offsite access improvements on Moccasin Wallow Road will comply with the roadway design criteria of the Florida Department of Transportation (FDOT). The internal roadway design will comply with Manatee County transportation design The District will fund and construct the offsite improvements and the access criteria. improvements within the District or in the alternative acquire much completed improvements from the developer. Manatee County will own, operate, and maintain the improvements on Moccasin Wallow Road as well as Fort Hamer Road and North River Ranch Trail. The District will construct the internal roadways. When the District does construct or acquire the roadways, they may be conveyed to Manatee County.

Stormwater Management

The stormwater management plan for the District focuses on utilizing newly constructed ponds in the uplands for stormwater treatment in conjunction with the naturally occurring wetlands. The County and the Southwest Florida Water Management District (SWFWMD) regulate the design criterion for the stormwater management system within the District, which is located within the Little Manatee River Watershed. The pre-development site runoff and water management conditions have been developed by the County and SWFWMD. The existing, onsite, naturally occurring wetlands have been delineated by SWFWMD. The primary objectives of the stormwater management system for the District are: 1) to provide a stormwater conveyance and

storage system, which includes stormwater quality treatment; 2) to adequately protect development within the District from regulatory-defined rainfall events; 3) to maintain wetland hydroperiods; 4) to ensure that adverse stormwater impacts do not occur upstream or downstream as a result of the development; and 5) to satisfactorily accommodate stormwater runoff from adjacent off-site areas that naturally drains through the District. Accommodating existing drainage conditions is a requirement of more than one regulatory agency and is an integral part of the infrastructure improvements constructed with development projects. The stormwater collection and outfall systems will be a combination of site grading, earthwork, stabilization, curb inlets, pipe culverts, control structures and open waterways. Wetland hydroperiods (normal pool and season high water elevations) will be maintained through proper design and maintenance of the outfall control structures. Curb inlets and pipe culverts in the District rights-of-ways will be owned, operated and maintained by the District as they are necessary components of the stormwater management system. Ponds that will serve the stormwater management system for the Project will be constructed as needed.

Wastewater System

The onsite wastewater system will consist of gravity collection lines with appurtenant manholes, and a pump station discharging to a force main that will connect to the existing County force main in the Fort Hamer Road right-of-way. When completed, wastewater system will be conveyed to, and owned and operated by, the County. Offsite utility extensions will be required before all of the units are constructed.

Potable Water Distribution System

The onsite potable water system will consist of distribution lines of varying sizes with appurtenant valves and backflow prevention equipment connecting to the existing water transmission lines in the Fort Hamer Road right of way. When completed, the potable water system will be conveyed to, and owned and operated, by the County.

Landscaping, Irrigation and Hardscape

Significant landscape features and associated irrigation systems are planned for the public rights of way and District-owned lands.. These features may include District entry monumentation at the entrances of the District, installation of irrigation wells, irrigation systems, and the perimeter buffer areas. The District will fund, construct and/or acquire, operate and maintain entry monumentation, irrigation systems and landscaping in publicly accessible areas of the District. The District will fund, construct, and maintain perimeter berms. There will be significant buffer plantings that will be installed along Fort Hamer Road with the construction of Fort Hamer Road 2nd Extension and North River Ranch Trail.

Recreation Faculties

Recreational facilities will be funded and maintained by the District, which may include a clubhouse, pool area, tot lot(s), dog park, trails and other recreational features. The recreational components will generally be within District open space, parks and other public areas. The District

will fund, construct and/or acquire, own and maintain these recreational facilities. The main amenity center for the district will be located within this phase of the project. The amenity center will feature a large community gathering building, game room, expansive event lawn, resort style pool and miles of nature trails that will connect to the extensive trail network throughout the development. All associated parking and utility infrastructure will be installed with the development of this facility.

Assessments, Fees, and Charges

The costs of acquisition or construction of a portion of these infrastructure improvements have been financed by the District through the sale of its Series 2023A Bonds and Series 2023B Bonds. The annual debt service payments, including interest due thereon, are payable solely from and secured by the levy of non-ad valorem or special assessments against lands within the District which benefit from the construction, acquisition, establishment and operation of the District's improvements. Specifically, the Series 2023A Assessments pay back the Series 2023A Bonds for its share of the Series 2023A&B Project infrastructure, and the Series 2023B Assessments pay back the Series 2023B Bonds for its share of the Series 2023A&B Project infrastructure, and the Series 2023A&B Project infrastructure. The annual debt service obligations of the District which must be defrayed by annual assessments upon each parcel of land or platted lot will depend upon the type of property purchased. Provided below are the current maximum annual assessment levels for the Series 2023A Bonds and the Series 2023B Bonds. Interested persons are encouraged to contact the District Manager for information regarding special assessments on a particular lot or parcel of lands. A copy of the District's assessment methodology and assessment roll are available for review in the District's public records.

(1) Gross assessments represent the assessment placed on the County tax roll each year, if the District elects to use the Uniform Method of collecting

non-ad valorem assessments authorized by Chapter 197 of the Florida Statutes. Gross assessments include a 7.0% gross-up to account for the fees of

the County Property Appraiser and Tax Collector and the statutory early payment discount.

The amounts described above exclude any operations and maintenance assessments which may be determined and calculated annually by the District's Board of Supervisors against all benefited lands in the District. These assessments will also be collected in the same manner as county ad valorem taxes.

Method of Collection

The District's debt service and operations and maintenance assessments may be billed directly by the District or may appear on that portion of the annual real estate tax bill entitled "non-ad valorem assessments," and are expected to be collected by the county tax collector in the same manner as county ad valorem taxes. Each property owner must pay both ad valorem and non-ad valorem assessments at the same time. Property owners will, however, be entitled to the same discounts as provided for ad valorem taxes. As with any tax bill, if all taxes and assessments due are not paid within the prescribed time limit, the tax collector is required to sell tax certificates which, if not timely redeemed, may result in the loss of title to the property. The decision to collect special assessments by any particular method – e.g., on the tax roll or by direct bill – does not mean that such method will be used to collect special assessments in future years, and the District reserves the right in its sole discretion to select collection methods in any given year, regardless of past practices
